

ENTREPOSAGE  
DROLET-PICARD INC.

## CHECK-LIST BEFORE DEPARTURE !!!

### I MUST MAKE SURE :

- ☐ That the contract and the inspection sheet are inside the vehicle, on the top of the driver's side sun visor, properly filled out and **signed**.
- ☐ Make sure I have access to the SAAQclic website and, if I store my vehicle, complete the storage on the first day of the departure month and put it back on the road on the first day of the return month. The vehicle may also remain registered.
- ☐ Notify my insurance company that the car will be stored for a certain period starting the following month (for travel management purposes) and possibly obtain a discount.
- ☐ Place the registration certificate and insurance papers (**up to date if possible**) on the driver's side sun visor. You don't need to send me the new documents for renewals during your deployment, if applicable.
- ☐ Place the winter or summer tires inside the vehicle if a change is needed.
- ☐ Make sure winter tires are available for a winter return to help prevent accidents.
- ☐ Place the wheel locks (lug nuts) and winter bolts, if applicable, on the front passenger floor mat to facilitate the tire change.
- ☐ Fill the fuel tank to the maximum and fully charge the vehicle battery. For a plug-in vehicle, also leave the charging cable in the vehicle.
- ☐ Do not leave any food, drinks, or sugary containers inside the vehicle (for hygiene reasons), or any explosive materials such as a gasoline can, propane bottle, etc.
- ☐ Update your departure date in your customer account on our website so that we can retrieve your vehicle at the right time.
